Resources:	100%	Scientific:	100%
Surface probes:	10	Cultural:	100%

The seedship is in orbit of the eighth planet of a blue supergiant star. Even a brief scan from orbit reveals far more information than its builders could know with their Earth-orbit-based telescopes, but the AI has little use for scientific curiosity. It has only one concern: whether this planet would make a suitable new home for the human race.

Atmosphere:	None
Gravity:	High
Temperature:	Very cold
Water:	Ice-covered surface
Resources:	None
Anomalies:	Possible structures

Launch surface probe
