Beyond the Trees

André Cerqueira

Watch on

Beyond the Trees is a cozy game where your device becomes an actual camera.

Hold up your phone (or look around on your screen) to find birds. Listen closely, line up your shot, and snap the photo. Every shot gets scored based on your framing and the quantity of birds.

How it works

- ★ Recommended
  Mobile: Move your device around, just like taking a real photo. Tap to snap!
- WebGL
  Browser: Use `W` `A` `S` `D` or `ARROWS` to look around. Press `SPACE`, `ENTER`, or use the on-screen button to take a photo.

- **Get Scored:** Get rated on your shots and try to beat your personal best.
