How to Play Fireboy and Watergirl

How do you control Fireboy and Watergirl?

Use the A,W,D keys to move Watergirl and use the arrow keys to move Fireboy. Since fire and water elements don't mix, be sure to not let Fireboy go in the water and don't let Watergirl get burned in the fire. Now that you know the controls, lets go over some helpful tips and tricks.

Avoid the Green Lake

This one is pretty straightforward, we know that as elementals Fireboy can only go on fire and Watergirl can only go in water, but what about the green lake? Both Fireboy and Watergirl have to avoid the green lake. Remember that if one of the characters die you have to restart.

Work Together

It might be tempting to run ahead with one character and try to finish the level with them before you go to the other, but there are many levels where this is simply impossible. Some levels have switches and buttons that require you to use both characters to get through. Make sure to use both Fireboy and Watergirl in tandem to help you beat each level.

Study The Level Before

One helpful tip you can use is to study the level before you try to beat it. Take a second to look over the level, and see what kind of obstacles are in your way. Take note of the "danger" areas or areas with green lakes. Once you know where all the obstacles are you can start to plan out how you want to beat the level. Taking a second to look over the level beforehand can go a long way in helping you beat all the levels.

Play With a Friend

Playing with a friend can be a great way to beat all the levels on Fireboy and Watergirl. One player can control Fireboy while the other can control Watergirl. This splits the work of the elemental duo in half and makes it so you only need to focus on one character. Plus who doesn't love playing games with their friend?

If you ever tire of Fireboy and Watergirl and want a different game to play with friends, make sure to check out the Tag game! Similar to Fireboy and Watergirl, you can play with another friend on the same computer as you run around the map together.

However, instead of working together, you will be going head-to-head against one another, trying to avoid getting tagged. To add even more intensity, you can actually have up to 4 players participate on the same device.
